

MD FLEX PU

04/10/16

Colors: black, gray, white	
Base	Polyurethane
Consistence	pasty
Application temperature	+5°C to +30°C
Flow ISO 7390	<2mm
Shrinkage ISO 10563	10 %
Density	1,18 g/ml
Tack free time 23°C/55% RH	ca. 60 minutes
Curing Speed (23°C, 50 % rF)	4 mm/24h
Frost resistant till -15°C during transport	yes
Shelf life between +5°C and +25°C	12 months
Paintable after curing	yes
Temperature resistance after curing	-40°C to +90°C
Mechanical properties 2 mm film	
Shore-A Hardness A 3s DIN 53505	50
Modul 100% DIN 53504	0,6 mPa.s (N/mm ²)
Elongation at break DIN 53504	>400 %
Product description	
<p>MD FLEX PU the material will be us where a high strength seam welding must be done between different structural members. MD FLEX PU suitable for in- and outside. Weather strain sealant and gluing of wood, metal, glass, ceramics and plastics is possible. MD FLEX PU is resistant against water, seawater and a lot of acid and lye.</p>	
<p>The values are average values. They serve merely for your information, but assume no warranty.</p>
